(54) ADAPTER FOR DAT

(57)Abstract:

PURPOSE: To provide an adapter for DAT which connects DAT and analog oscilloscope and functions as a storage oscilloscope.

CONSTITUTION: The signal from an analog oscilloscope B is digital converted with an AD converter 3, then quantamized with bit number increased for a predetermined number in an expander 4 in the case the DAT recorder C is in LP mode and input in the DAT recorder through a DAI transmitter 5. Similarly in the case the DAT recorder C is in LP mode, the bit number is compressed with a compressor and the signal is sent through a DA converter 12 to an analog oscilloscope B. With this adapter A, the analog oscilloscope B can be functioned as a storage oscilloscope.
